# NumériClasse

by **MilliWeb**

Digital Education is **is not** **only** online

Our products

NumériTab

Compatible with Windows 8 and Android : NumériTab is a digital environment designed for pedagogical uses of tablets in class. It is currently available for Windows 8 as well as Android version 4.0 and above.

Designed for teachers : Each teacher has the opportunity to build his own course sessions containing the apps and contents of his choice. Students are then able to consult it directly from their tablets in class.

Remote configuration : Tablet management is made through a web interface which allows an administrator to easily install new contents and apps, but also to change various parameters such as access codes, Wi-Fi settings...

A secured environment : NumériTab is a solution which replaces the device's native interface with an education-driven environment which displays only authorized contents, blocks access to settings, filters Internet browsing...

Monitoring functionalities : During a course session, the teacher has the possibility visualize his students' tablets state and interact with it : screen lock, content execution, file sending, wireless display...

User management : Each teacher account is attached to an administrator who manages users access rights has access to detailed usage statistics such as sessions data, disk space consumption...

ALSO AVAILABLE ON USB STICK FOR WINDOWS, MAC ET LINUX

MilliBox

Contents and Apps Server : Thanks to its 500GB HDD (SSD in option) and its integrated software suite, teachers can easily create, store and diffuse customized course sessions just by connecting their device to the Millibox.

Connected or not to the Internet : Mobile and autonomous with its compact format and its built-in battery, Millibox can also operate independently, without requiring any Internet access or a permanent power source.

Wi-Fi Access Point : You can connect the Millibox to your network through the built-in RJ45 port and connect up to 32 tablets to the Internet via Wi-Fi. If needed you also have the possibility to use a 3G/4G (LTE) SIM card.

Fast and easy to deploy : Thanks to its one click startup requiring no installation and its simplified administration console, the MilliBox be deployed in a minute, even in complex infrastructures requiring specific IP or Gateway address.

Easy management : In addition to offer a simplified management console, the MilliBox can synchronize itself with the Cloud to automatically fetch contents and sessions previously created by teachers out of school.

Contains many modules : Digital content creation, course session creation and diffusion, collaborative editor, tablets monitoring, One-click Android tablet configuration with NumériTab, our dedicated application...

IDEAL FOR BYOD PROJECTS AND LOW CONNECTIVITY ZONES

About MilliWeb

Milliweb is a start-up specialized in cloud and mobile technologies for Education and lifelong learning. Our objective is to adapt technology to teachers' needs and help them to include digital tools to their pedagogical practices in a smooth and effective way.

That's why, in collaboration with education professionals and institutions, we designed innovative solutions which tackle various issues frequently encountered in the field such as : setting up a digital classroom controlled by the teacher, turning a consumer tablet into a secured and education-driven platform, designing open solutions allowing teachers to use their own resources and methods, solving connectivity issues both in class and at home, or providing easily deployable BYOD-compliant environments which simplify the implementation of innovative teaching practices such as flipped-classroom and differentiated pedagogy.
